

CHIP WOOD

Eco friendly way to start any fire!

eco friendly

easy to ignite

odorless

compact

Chip Wood fire starters are a quick, safe, and easy way to start any indoor or outdoor fire. Our company produces them using wood chip waste combined with food-grade paraffin wax. This specific mix is what makes this product eco friendly and waterproof.

They can easily be lighted with a match and burn hot for about 15 minutes, half a piece will burn for about 8 minutes, making it an ideal fire starter for fireplaces, grills and campfires as well as wood & pallet stoves.

Its clean and simple design is guaranteed to nicely blend in with any setting, our product will attract attention in any retail environment. Packages are individually EAN-13 barcoded as well as master carton barcoded. We also offer both private labeling and custom packaging to your specifications.
