

CHIP WOOD

ECO FRIENDLY • ODORLESS • EASY TO IGNITE • COMPACT

ChipWood fire starters are a quick, safe, and easy way to start an indoor or outdoor fire. Our company produces them using deciduous wood chips combined with high-quality fully refined paraffin wax. This specific mix is what makes this product eco-friendly and waterproof.

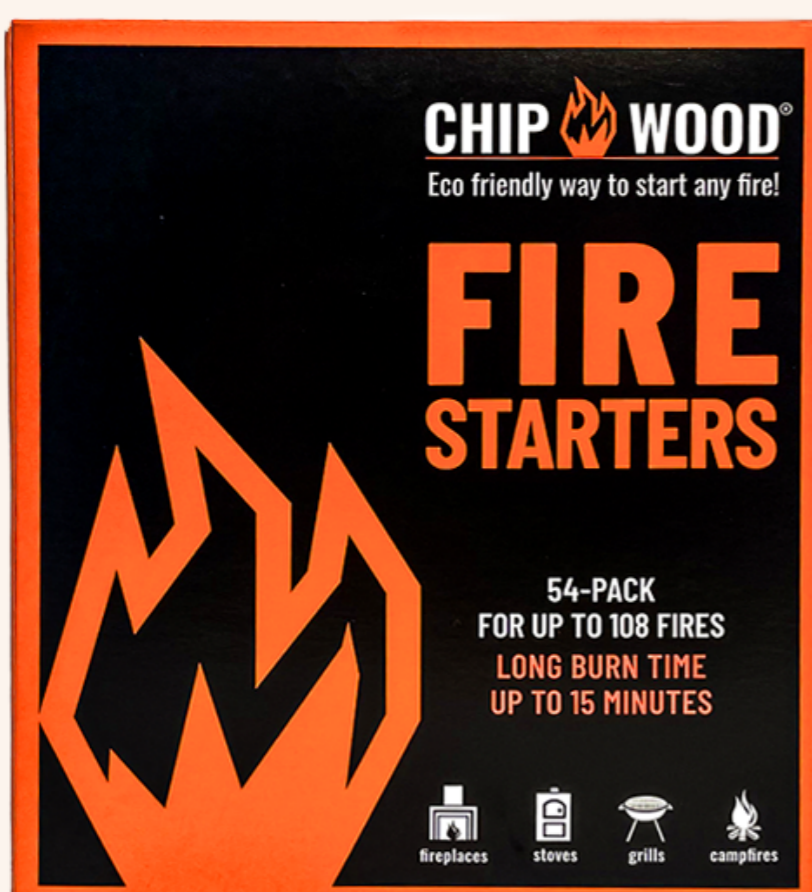

They can easily be lighted with a match and burn hot for about 15 minutes, half a piece will burn for about 8 minutes, making it an ideal fire starter for fireplaces, grills, campfires as well as wood & pellet stoves.

It is clean and simple design is guaranteed to nicely blend in with any setting, our product will attract attention in any retail environment. Packages are individually EAN-13 barcoded as well as master carton barcoded. We also offer both private labeling and custom packaging to your specifications.
